***Laboratories require blocks of two hours.**

Tips for timetabling - *Hints on organizing a conflict-free timetable:*

1. Begin by scheduling those courses with only one section.
2. Then enter those courses with associated tutorials or laboratory sessions, being careful to include ALL the hours these require.
3. Finally, schedule those courses that offer a number of sections.

As registration proceeds, it may become increasingly difficult to obtain desired courses or sections. Before accessing the Registration System, you should plan at least one alternative timetable in case you cannot get the courses or sections you want. If you require assistance with course planning, contact the Counselling Department.
